

GSQ DD&T Executive Platform — mockup views

Initiative Roadmap, Business Review, and Digital Maturity — screens, explanations, and workflows.

Combined

Three views

Tab sheets

Contents

1. Initiative Roadmap View — purpose, workflow, Roadmap, Status KPIs, Gantt + Budget, Budget
2. Business Review View — purpose, workflow, All Sites map, Thousand Oaks beats
3. Digital Maturity View — purpose, workflow, Capability
4. Tab sheets — one PDF-equivalent section per live tab in those views

Rules used in this kit

- Title stays **GSQ DD&T Executive Platform**
- Live workbench only — not the Leadership Briefing copy
- No invented Jira keys, SPOT IDs, dates, or money
- Vashi reports to Europe; Yaroslavl reports to APAC
- English only

Separate PDFs for each view and tab live beside this file in design-assets/mockup-pdfs/.

Initiative Roadmap View

Screen mockups, explanations, and workflow for Roadmap, Status KPIs, Gantt + Budget, and Budget.

- Roadmap
- Status KPIs
- Gantt + Budget
- Budget

What this view is

The Initiative Roadmap view is how a Site Head or GSQ executive sees work on the six Big Rocks across FY2026–FY2028+, then checks heat, dates, and money without leaving the Glass.

Live tabs in this view:

- **Roadmap** — One pager grid (SharePoint OnePager)
- **Status KPIs** — counts from the same list
- **Gantt + Budget** — FY26–FY30 bars plus SPOT sidebar
- **Budget** — finance-first SPOT roll-up

Sourced snapshot · 13 Sep 2026

- All Sites TOTAL CAPEX **\$15,069,520**
- All Sites TOTAL OPEX **\$3,540,483**
- Approved CAPEX **\$10,892,851**
- 58 SPOT projects · 75 roadmap rows Integration needed
- THO Elaprased money row: **DDTTO-3 / SPOT 1024096 / TOTAL CAPEX \$0**
- THO APMS: **DDTTO-54 / SPOT 1051357**
- Product investment remains **SPOT 1063647** (\$168,000, excluded from site rollups)

Bar lengths on Status KPIs charts are chrome only. Live initiative counts come from SharePoint OnePager and are not invented here. Roadmap cards use harvested THO SPOT and gap rows.

WORKFLOW

How a Site Head reads the roadmap

30–45 minutes before a Thursday business review, or a 5-minute executive scan.

This site

Network / All Sites

Recommended path

Step 1

Set SITE

ALL SITES for network money, or THO · Thousand Oaks for the plant.

Step 2

Status KPIs

Read Projects, On Track, At Risk / Delayed. Click a tile.

Step 3

Roadmap

The filter lands on the One pager. Open the Elaprased card.

Step 4

Gantt + Budget

Confirm SPOT 1024096 dates versus the \$0 CAPEX row.

Step 5

Budget

If the question is money-first, stay on the Budget tab.

Sidecar / card click does not write Jira or SPOT. Drag on Roadmap updates Big Rock × FY mapping only.

Do not confuse these keys

- Golden thread display may still show **TO MES Elaprased DS · DDTTO-12 · SPOT 1024096**.
- SPOT Budget harvest is **DDTTO-3 / 1024096 / TOTAL CAPEX \$0**.
- Do not invent a second Elaprased SPOT.
- APMS Thousand Oaks is **DDTTO-54 / 1051357**, not an older 1041357 mock ID.

Jira host is onetakeda.atlassian.net. SPOT host is tospot.azurewebsites.net. Both stay read-only in the Glass.

Business Review View

Screen mockups, explanations, and workflow for Portfolio Health — the live Business Review tab.

Portfolio Health

Map

Six beats

Site input

What this view is

The Business Review view is the live **Portfolio Health** tab. It replaces a slide factory. The meeting runs from six beats assembled from Roadmap, Budget, Risks, Capability, and Site input.

- All Sites opens the 18-site map and regional chips.
- A plant opens that site's geographic picture and Org Explorer heads.
- Commentary and asks are SharePoint-only. Jira and SPOT stay read-only.

Six meeting beats

1. Portfolio pulse — OnePager mix
2. Delivery health — on-track %
3. Financial outlook — SPOT CAPEX / OPEX
4. Risk decisions — SharePoint Risks
5. Capability progress — IntegrationsTracker % live
6. Leadership asks — SharePoint LeadershipAsks

Org Explorer is the source of record for site heads. BUE and YAR remain not listed.

Do not invent commentary, asks, risk titles, or capability percentages. Empty states in the live app are "No current commentary" and "No current leadership asks."

WORKFLOW

How Thursday's review runs from the portal

30–45 minutes. Freeze pack is a snapshot, not a new data store.

Site Head

Site DD&T

Finance

Digital lead

In-room path

Step 1

Map

Confirm SITE. All Sites for network; click THO for the plant.

Step 2

Beats 1–2

Portfolio pulse and delivery health from OnePager.

Step 3

Beat 3

Money vs time — jump to Gantt + Budget if a bar needs airtime.

Step 4

Beats 4–5

Risks tab, then Capability for North Star adoption.

Step 5

Beat 6

Asks from Site input. Decisions are typed there after the meeting.

Write path

- Site input URL:
mytakeda.sharepoint.com/sites/GSQExecutivePlatform
- Allowed writes: commentary, local risk, leadership ask, go-live confirm, mapping
- Never written: Jira status, Jira dates, SPOT budget, EDB deploy/adopt
- Vashi reports to Europe. Yaroslavl reports to APAC.

Acceptance: one Thousand Oaks review runs entirely from this tab. Slide-building hours drop for that review.

Digital Maturity View

Screen mockups, explanations, and workflow for the Capability tab.

- Capability
- IntegrationsTracker
- CapabilityTracker

What this view is

The Digital Maturity view is the live **Capability** tab. It answers whether North Star systems are deployed, adopted, and integrated — the question the Initiative Roadmap Gantt cannot answer.

- Lists: IntegrationsTracker and CapabilityTracker
- Filters: geography, site (bound to header SITE), status
- Toggle: Actuals (deploy %) vs FY26 Forecast (adopt %)
- Cards group by domain pair, then integration ID

KPI strip

- **Total** — tracker rows for the site
- **In Progress** — status InProgress
- **Not Started** — NotStarted or NotPlanned
- **% Live** — Live, Validated, Adopted, Deployed, or Active
- **% Actuals** — average deployPct

Live numbers are SharePoint. This PDF does not invent deploy or adopt %.

Domain sort puts Engineering / Manufacturing first, then Engineering, then other pairs. CapabilityTracker rows attach when reqIntIds contains the integration ID.

How a digital lead reads maturity

Use after Roadmap and Gantt, when the question is “is it used?” not “when does it land?”

Actuals

FY26 Forecast

Path

Step 1**Set SITE**

THO, LEX, or BRP for plants that already have tracker history.

**Step 2****KPI strip**

Read % Live and % Actuals before opening cards.

**Step 3****Domain cards**

Open Engineering / Manufacturing first (MES pairs).

**Step 4****Toggle Forecast**

FY26 Forecast switches bars to adopt %.

**Step 5****Jump back**

A pending pair can be discussed on Roadmap or Risks.

Rules

- Deployed ≠ adopted. Adopted means the usage threshold is met.
- Header SITE drives the list filter. The in-tab site control is display-only.
- All Sites uses all 18 SiteCodes.
- Empty copy: No tracker records match the selected filters.

Acceptance in the design blueprint: THO, LEX, and BRP match the published tracker after the same filters.

Portfolio Health tab

Live Business Review: network map, plant picture, Org Explorer strip, six beats.

Portfolio Health

All 18 sites

Six beats

Purpose

Open the review. All Sites shows the map. A plant shows geography, heads, and six beat cards bound to OnePager, SPOT, Risks, Capability, and Asks.

Workflow

1. Start on All Sites.
2. Click THO.
3. Walk beats 1–6.
4. Jump to Roadmap / Gantt / Risks / Capability as needed.
5. Type decisions on Site input after the meeting.

Vashi reports to Europe. Yaroslavl reports to APAC. BUE and YAR are not listed on Org Explorer.
