

Risks tab

Only what needs leadership airtime this cycle.

Risks

Live workbench

Purpose

SharePoint Risks for the selected site. Used as beat 4 of the Business Review.

Workflow

1. Read the red banner.
2. Scan owner and due.
3. Open a Jira key if present.
4. Add a local risk on Site input, not here.

This PDF does not invent risk titles. Live empty copy: No risks found.

Site input

Review local risks this cycle. Prioritize mitigation and ownership updates.

Title	Glyph	Owner	Due	Reference	Big Rock	Source	Mitigation
Live rows come from the SharePoint Risks list for the selected site. All-sites empty copy: No risks found across the 18 sites. Site empty copy: No risks found. Do not invent risk titles, owners, or due dates for a briefing.							

Jira keys in a title open onetakeda.atlassian.net. Local risks without a Jira key show as Local. Site Heads type new local risks on Site input — this tab does not write Jira.

- 1

Banner
Network vs local copy depends on SITE.
- 2

Columns
Title, owner, due, reference, source, mitigation.
- 3

Jira
Keys open onetakeda.atlassian.net.
- 4

Write
Local risks are typed on Site input.
