

Status KPIs tab

Heat before cards. Counts come from the One pager list for the selected site.

Status KPIs

Live workbench

Purpose

Projects, On Track, Started, At Risk / Delayed, and on-track %. Click a tile to filter Roadmap.

Workflow

1. Read the hero sentence.
2. Click At Risk / Delayed if attention > 0.
3. Confirm coverage % before trusting money on Budget.

This PDF does not invent initiative counts. Live totals must equal the filtered Roadmap card count.

Donut = On Track · Started · At Risk · Delayed.
Centre number = mapped initiatives for the selected site.
Totals must equal the filtered Roadmap card count.

Execution by Big Rock

One Day Batch Release

Lab of the Future

Predictive Maintenance

Rapid Digital Tech Transfer

Inventory Optimization

Power of Digital Twins

Bar length is a layout stand-in. Live values are OnePager counts per Big Rock.

Delivery health by fiscal year

FY2026

FY2027

FY2028

Stack = On Track · Started · At Risk · Delayed. Lengths are chrome only. Live stacks come from OnePager.

One pager coverage

Jira linkage — share of initiatives with a Jira key (opens onetakeda.atlassian.net).

SPOT coverage — share of initiatives with a SPOT ID. Gaps are Integration needed.

Percent bars above are chrome only. Live % is calculated from the One pager list.
