

Business Review View

Screen mockups, explanations, and workflow for Portfolio Health — the live Business Review tab.

Portfolio Health

Map

Six beats

Site input

What this view is

The Business Review view is the live **Portfolio Health** tab. It replaces a slide factory. The meeting runs from six beats assembled from Roadmap, Budget, Risks, Capability, and Site input.

- All Sites opens the 18-site map and regional chips.
- A plant opens that site's geographic picture and Org Explorer heads.
- Commentary and asks are SharePoint-only. Jira and SPOT stay read-only.

Six meeting beats

1. Portfolio pulse — OnePager mix
2. Delivery health — on-track %
3. Financial outlook — SPOT CAPEX / OPEX
4. Risk decisions — SharePoint Risks
5. Capability progress — IntegrationsTracker % live
6. Leadership asks — SharePoint LeadershipAsks

Org Explorer is the source of record for site heads. BUE and YAR remain not listed.

Do not invent commentary, asks, risk titles, or capability percentages. Empty states in the live app are "No current commentary" and "No current leadership asks."

How Thursday's review runs from the portal

30–45 minutes. Freeze pack is a snapshot, not a new data store.

In-room path

Step 1**Map**

Confirm SITE. All Sites for network; click THO for the plant.

**Step 2****Beats 1–2**

Portfolio pulse and delivery health from OnePager.

**Step 3****Beat 3**

Money vs time — jump to Gantt + Budget if a bar needs airtime.

**Step 4****Beats 4–5**

Risks tab, then Capability for North Star adoption.

**Step 5****Beat 6**

Asks from Site input. Decisions are typed there after the meeting.

Write path

- Site input URL:
mytakeda.sharepoint.com/sites/GSQExecutivePlatform
- Allowed writes: commentary, local risk, leadership ask, go-live confirm, mapping
- Never written: Jira status, Jira dates, SPOT budget, EDB deploy/adopt
- Vashi reports to Europe. Yaroslavl reports to APAC.

Acceptance: one Thousand Oaks review runs entirely from this tab. Slide-building hours drop for that review.
